

Executive Summary

This deliverable provides a comprehensive overview of all dissemination activities that AutoNet2030 partners undertook to promote project's ideas and findings to the different selected target audiences and efficiently disseminate project's results to the scientific and technical communities. This work was carried out as part of WP6 "Dissemination and standardization".

Specifically, the present deliverable gives an overview of the established AutoNet2030 communication channels and means and gives more information about their performance in reaching a wide range of stakeholders. The major dissemination activities carried out are presented while a thorough list of all dissemination activities performed during the AutoNet2030 lifetime is included in Annex 1. Links to exploitation are also discussed in the last part of the deliverable.
